

TETRAMETHYLETHYLENEDIAMINE

BY KOEI CHEMICAL COMPANY LIMITED, JAPAN

Koei Chemical Company Limited, formerly known as Koei Co Ltd, is a producer of polyols, formalins, and pharmaceutical base ingredients including pyridines, pyrazines, and amines. The company was founded in June of 1917 and has its registered head office located in Osaka, Japan. Koei Chemical has two manufacturing plants, which are located in Osaka, and Chiba, Japan.

CAS NO : 110-18-9

**CHEMICAL NAME
AND FORMULA** : N,N,N,N – TETRAMETHYLETHANE -1, 2 – DIAMINE

SPECIFICATIONS

Purity : min. 99%
Water : max. 0.5%

PACKING : 155 kg /drum.

AVAILABILITY : On high seas and indent basis.

APPLICATION : **TMEDA** is a tertiary amine base used to catalyze the formation of free radicals from ammonium persulfate or riboflavin. The free radicals will cause acrylamide and bis-acrylamide to polymerize to form a gel matrix which can be used for sieving macromolecules.
